Department of Toxic Substances Control

START WORK NOTICE

ONSITE AND OFFSITE FIELD WORK ACTIVITIES

**Former Cal Compact Landfill Site
20400 Main Street, Carson, California**

Arnold Schwarzenegger
Governor

Field work activities related to a landfill soil cover investigation, physical site characterization, landfill gas pilot test and on/offsite groundwater investigation of the Former Cal Compact Landfill site is scheduled to begin the week of March 20th and may continue through September 2006.

Field work activities will consist of collecting soil, soil gas and groundwater samples from the 157-acre site. Groundwater samples will also be collected offsite in areas surrounding the property. Boring holes created as a result of collecting samples will be backfilled once sampling at each location is complete. A landfill gas study will be conducted onsite during this period as well and will consist of operating a temporary landfill gas extraction and treatment system. Tetra Tech, Inc., an environmental contractor, and its subcontractors will perform the field work under the oversight of the Department of Toxic Substances Control (DTSC), a state regulatory agency. Data collected from the investigation will be used to prepare the final design plans for the site.

Efforts will be taken to minimize noise and disruptions to traffic. No street closures are planned at this time. Should street closures be required, coordination with the City of Carson will be conducted. The total duration of the investigation work will be approximately 28 weeks, with field work activities occurring intermittently during that period. Field work activities will occur between 7:00 am and 7:00 pm and will be limited to weekdays. DTSC will continue to oversee field work activities conducted both on/offsite and inform the local community and interested stakeholders on current and future activities. The investigation work plans associated with the landfill soil cover investigation, physical site characterization, landfill gas pilot test, and the on/offsite groundwater investigation are available for viewing at:

Carson Regional Library

151 E. Carson Street, Carson, California 90745
